DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 2, 3 and 8, drawn to a method of treating neurodegenerative disease comprising administering a transglutaminase inhibitor.

Group II, claim(s) 4, 5 and 8, drawn to a method of treating a cell-mediated autoimmune disease comprising administering a transglutaminase inhibitor.

Group III, claim(s) 6-8, drawn to a method of treating the inflammatory disease of the central nervous system comprising administering a transglutaminase inhibitor.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is related to a method of treating neurodegenerative disease comprising administering a transglutaminase inhibitor while Groups II and III are related to treatment of a cell mediated autoimmune disease and the inflammatory disease of the central nervous system, respectively. The diseases in Group II and III do not related to the disorder in Group I, since they have different known etiology.

Therefore, Applicant is required to elect a single invention of Groups I-III.

Art Unit: 1617

Claims 1, 15 and 16 are generic claims therefore they will be examined with an elected group.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
